

## What providers and patients are saying...

“ Women’s intimate wellness can be impacted by childbirth, hormonal changes, menopause, and aging. These changes can impact women in a variety of physical, functional, and intimate ways.

*ThermiVa provides instant gratification to providers and patients with the ability to see changes in tissue immediately, during the treatment. There is no device like it that accomplishes so much. It’s a win-win all around.”*

- Dr. Soyini Hawkins

“ As you get older, women’s bodies change and just don’t work the same, and it’s like [ThermiVa] brings back that youth that you had.

*I’m very pleased with it - my husband’s very pleased with it.”*

-Patient of Dr. Gregory Buford

“ I feel very confident... I love it, it was great! [ThermiVa] was really the best decision.”

- Patient of Dr. Michelle Eagan

Reclaim. Restore. Revive.

Introducing...

# THERMiVa®

Excessive stretching of the vaginal muscles is a common occurrence after vaginal birth or simply due to aging. Damage can diminish sensation during sexual activity, reduce satisfaction, and change the relationship between partners. Laxity of the skin is caused by numerous factors and no area is immune to this natural decline.

## Reclaim. Restore. Revive.

Worldwide, women want to reclaim their younger or “pre-baby” bodies. Restore their satisfaction. Revive their relationships. At TherMi®, we believe women deserve to reclaim, restore, and revive their vulvovaginal youthfulness and well-being.

## Why radiofrequency?

TherMiVa® treatments use radiofrequency energy to gently heat tissue to rejuvenate collagen, without discomfort or downtime.

“When heated, collagen fibrils will denature and contract, which is believed to lead to the observed tissue tightening.”<sup>1</sup>

## Start the Conversation.

How would you rate your level of sexual desire?

- |             |              |
|-------------|--------------|
| 1. Very low | 2. Low       |
| 3. Moderate | 4. Very high |

Has your relationship with your partner been adversely affected due to childbirth or the natural aging process?

- |               |               |
|---------------|---------------|
| 1. Definitely | 2. Somewhat   |
| 3. Minimally  | 4. Not at all |

How would you rate your sexual satisfaction during intercourse?

- |         |              |
|---------|--------------|
| 1. Poor | 2. Fair      |
| 3. Good | 4. Excellent |

How confident are you about becoming aroused during sexual activity?

- |                        |                        |
|------------------------|------------------------|
| 1. No confidence       | 2. Very low confidence |
| 3. Moderate confidence | 4. Very confident      |

Do you experience discomfort during intercourse due to dryness?

- |                     |                    |
|---------------------|--------------------|
| 1. Yes, I avoid sex | 2. Often           |
| 3. Sometimes        | 4. Rarely or never |

Do you frequently experience urinary leaking or urgency?

- |            |              |
|------------|--------------|
| 1. Usually | 2. Sometimes |
| 3. Rarely  | 4. Never     |

How would you rate your vaginal tightness?

- |                     |                     |
|---------------------|---------------------|
| 1. Very loose       | 2. Moderately loose |
| 3. Moderately tight | 4. Very tight       |

*If you scored a “1” or “2” on any of the questions above, bring this in to your doctor to discuss new treatment options available.*

## Take back control.

Women don't want to feel as though they've lost control of their body - especially when it affects intimate parts of their life. Relationships can pose challenges under the best circumstances; the last thing women need is to struggle as mind and body fight to coincide.
